InFocus
Collaboration That Works

The InFocus JTouch combines precise touchscreen technology with a bright, colourful LCD display to engage audiences in classrooms and beyond

- 55", 65", 70", 84", 98", 1080P to 4K*2K touch display for a great price
- Add touch to your system's Windows apps, even the older ones
- Your content will be interactive, bright and crisp in any light
- Accurate and responsive touch overlay with multi-touch capability
- Quickly connect and display your PC and notebook via HDMI, VGA and more
- Convenient interfaces on the front and back for easy and quick connect to external devices

Brightness and Clarity

JTouch helps you get your message across and connect with your audience with incredible brightness, colour and clarity. Your images, text and video will be seen and enjoyed even in large spaces with high ambient light.

Engage Your Audience with Touch

Whether you're in a classroom, board room or at a trade show, the interactivity of JTouch engages audience and encourages participation. JTouch gets students involved, attracts customers, and provides a great medium for testing and presenting touch-enabled applications.

Easy to Connect

JTouch provides multiple ways to display your content, including HDMI, VGA, and wireless via optional InFocus LiteShow adapter. To enable touch, simply connect the JTouch to your computer via USB.

Multi-touch with Gestures

Use multi-point touch gestures to manipulate your content and traverse your Windows, Mac or Chrome device on the giant touchscreen. Your software and content will come to life on a giant scale to engage your audience and encourage their interaction.

Location, Location, Location

Secure the JTouch to the wall with its standard VESA mounting pattern or mount it on an optional InFocus mobile cart. A mobile cart lets you position it in multiple locations within a room or share it between multiple rooms – whenever it's needed most.
